

## NY Clean Energy Dashboard Programs Progress and Plans: Beginning 2016 Data Dictionary

### Commonly used terms:

- **Acquired Savings:** Energy savings are generally considered acquired when both the measure is installed and currently operational, and the funds associated with the measure or project have been expended.
- **Committed Savings:** Energy savings are considered committed when the funds associated with the measure are encumbered. This does not include acquired savings.
- **Encumbered Funds:** The current amount of funds that are tied to executed contracts, completed applications which have been determined to meet basic eligibility criteria but for which the program administrator does not have in hand an executed contract, and contracts awarded through competitive solicitations which are not yet executed.
- **Expended Funds:** Funds that have been paid or remitted.
- **Gross Annual Savings:** Savings associated with a measure during a full year of installation, as estimated by deemed savings approaches or algorithms contained in the Technical Resource Manual (TRM), or custom analysis/modeling, without any evaluation adjustments applied (such as free-riders, spillover or realization rates).
- **Gross Lifetime Savings:** Savings over the lifetime of a measure, based on the measure's Effective Useful Life, that have not been adjusted for free-ridership, spillover or realization rates.
- **Indirect:** Energy benefits due to longer-term market effects from follow-on activity not directly funded by Program Administrators.

Data Label	Data Type	Data Description
Program Administrator	Text	An entity (NYSERDA or an investor-owned utility) which administers the program
Fuel-type Funding Source	Text	Program funding source, either electric or gas
Portfolio	Text	Collection of programs or initiatives
Primary End-Use Sector	Text	End-use sectors that purchase or produce energy for their own consumption and not for resale
Scorecard ID	Text	Unique identifier
Program Name	Text	Name of clean energy program
NYS Clean Heat	Text	"Yes" or "No" to indicate whether program is part of New York State Clean Heat
New Efficiency: New York	Text	"Yes" or "No" to indicate whether program is part of New Efficiency: New York
LMI/Market Rate	Text	Indicates whether a program addresses the LMI or "Low-to-Moderate Income" customers or "Market Rate" customers
Active / Inactive	Text	"Active" indicates a program has open solicitations and/or is actively engaging the market
Reporting Period	Text	Year and quarter through which data is being reported

Year	Date	Calendar year of reporting period
Electricity Savings (MWh) Annual Realization Rate Type	Text	The type of realization rate (either VGS or AP) to be applied against reported gross savings as a result of EM&V activities. A VGS or "Verified Gross Savings" realization rate is reported by an independent evaluator after the energy efficiency program activities and Gross Savings Analysis are complete. An AP or "Alternative Prospective" realization rate is the expected rate a program would experience as a result of the PA implementing recommended actions that are detailed in the Gross Savings Analysis Report. If no realization rate is applicable to the savings, this field is left blank.
Electricity Savings (MWh) Annual Realization Rate	Numeric	The ratio of Verified Gross Savings to Gross Savings, expressed as a decimal. This value indicates the performance of a program's reported Gross Savings relative to actual realized savings. For Alternative Prospective Realization Rates, this value is developed by an independent evaluator and represents the expected realization rate a program would experience from the PA implementing recommended actions detailed in the Gross Savings Analysis.
Electricity Usage (MWh) Annual Realization Rate Type	Text	The type of realization rate (either VGS or AP) to be applied against reported gross savings as a result of EM&V activities. A VGS or "Verified Gross Savings" realization rate is reported by an independent evaluator after the energy efficiency program activities and Gross Savings Analysis are complete. An AP or "Alternative Prospective" realization rate is the expected rate a program would experience as a result of the PA implementing recommended actions that are detailed in the Gross Savings Analysis Report. If no realization rate is applicable to the savings, this field is left blank.
Electricity Usage (MWh) Annual Realization Rate	Numeric	The ratio of Verified Gross Savings to Gross Savings, expressed as a decimal. This value indicates the performance of a program's reported Gross Savings relative to actual realized savings. For Alternative Prospective Realization Rates, this value is developed by an independent evaluator and represents the expected realization rate a program would experience from the PA implementing recommended actions detailed in the Gross Savings Analysis.
Natural Gas Savings (MMBtu) Annual Realization Rate Type	Text	The type of realization rate (either VGS or AP) to be applied against reported gross savings as a result of EM&V activities. A VGS or "Verified Gross Savings" realization rate is reported by an independent

		evaluator after the energy efficiency program activities and Gross Savings Analysis are complete. An AP or "Alternative Prospective" realization rate is the expected rate a program would experience as a result of the PA implementing recommended actions that are detailed in the Gross Savings Analysis Report. If no realization rate is applicable to the savings, this field is left blank.
Natural Gas Savings (MMBtu) Annual Realization Rate	Numeric	The ratio of Verified Gross Savings to Gross Savings, expressed as a decimal. This value indicates the performance of a program's reported Gross Savings relative to actual realized savings. For Alternative Prospective Realization Rates, this value is developed by an independent evaluator and represents the expected realization rate a program would experience from the PA implementing recommended actions detailed in the Gross Savings Analysis.
Con Edison District Steam System Savings (MMBtu) Annual Realization Rate Type	Text	The type of realization rate (either VGS or AP) to be applied against reported gross savings as a result of EM&V activities. A VGS or "Verified Gross Savings" realization rate is reported by an independent evaluator after the energy efficiency program activities and Gross Savings Analysis are complete. An AP or "Alternative Prospective" realization rate is the expected rate a program would experience as a result of the PA implementing recommended actions that are detailed in the Gross Savings Analysis Report. If no realization rate is applicable to the savings, this field is left blank.
Con Edison District Steam System Savings (MMBtu) Annual Realization Rate	Numeric	The ratio of Verified Gross Savings to Gross Savings, expressed as a decimal. This value indicates the performance of a program's reported Gross Savings relative to actual realized savings. For Alternative Prospective Realization Rates, this value is developed by an independent evaluator and represents the expected realization rate a program would experience from the PA implementing recommended actions detailed in the Gross Savings Analysis.
Heating Oil Savings (MMBtu) Annual Realization Rate Type	Text	The type of realization rate (either VGS or AP) to be applied against reported gross savings as a result of EM&V activities. A VGS or "Verified Gross Savings" realization rate is reported by an independent evaluator after the energy efficiency program activities and Gross Savings Analysis are complete. An AP or "Alternative Prospective" realization rate is the expected rate a program would experience as a result of the PA implementing recommended actions that are detailed in the Gross Savings Analysis Report. If no

		realization rate is applicable to the savings, this field is left blank.
Heating Oil Savings (MMBtu) Annual Realization Rate	Numeric	The ratio of Verified Gross Savings to Gross Savings, expressed as a decimal. This value indicates the performance of a program's reported Gross Savings relative to actual realized savings. For Alternative Prospective Realization Rates, this value is developed by an independent evaluator and represents the expected realization rate a program would experience from the PA implementing recommended actions detailed in the Gross Savings Analysis.
LPG Savings (MMBtu) Annual Realization Rate Type	Text	The type of realization rate (either VGS or AP) to be applied against reported gross savings as a result of EM&V activities. A VGS or "Verified Gross Savings" realization rate is reported by an independent evaluator after the energy efficiency program activities and Gross Savings Analysis are complete. An AP or "Alternative Prospective" realization rate is the expected rate a program would experience as a result of the PA implementing recommended actions that are detailed in the Gross Savings Analysis Report. If no realization rate is applicable to the savings, this field is left blank.
LPG Savings (MMBtu) Annual Realization Rate	Numeric	The ratio of Verified Gross Savings to Gross Savings, expressed as a decimal. This value indicates the performance of a program's reported Gross Savings relative to actual realized savings. For Alternative Prospective Realization Rates, this value is developed by an independent evaluator and represents the expected realization rate a program would experience from the PA implementing recommended actions detailed in the Gross Savings Analysis.
Other Fuel Savings (MMBtu) Annual Realization Rate Type	Text	The type of realization rate (either VGS or AP) to be applied against reported gross savings as a result of EM&V activities. A VGS or "Verified Gross Savings" realization rate is reported by an independent evaluator after the energy efficiency program activities and Gross Savings Analysis are complete. An AP or "Alternative Prospective" realization rate is the expected rate a program would experience as a result of the PA implementing recommended actions that are detailed in the Gross Savings Analysis Report. If no realization rate is applicable to the savings, this field is left blank.
Other Fuel Savings (MMBtu) Annual Realization Rate	Numeric	The ratio of Verified Gross Savings to Gross Savings, expressed as a decimal. This value indicates the performance of a program's reported Gross Savings

		relative to actual realized savings. For Alternative Prospective Realization Rates, this value is developed by an independent evaluator and represents the expected realization rate a program would experience from the PA implementing recommended actions detailed in the Gross Savings Analysis.
Natural Gas Usage (MMBtu) Annual Realization Rate Type	Text	The type of realization rate (either VGS or AP) to be applied against reported gross savings as a result of EM&V activities. A VGS or "Verified Gross Savings" realization rate is reported by an independent evaluator after the energy efficiency program activities and Gross Savings Analysis are complete. An AP or "Alternative Prospective" realization rate is the expected rate a program would experience as a result of the PA implementing recommended actions that are detailed in the Gross Savings Analysis Report. If no realization rate is applicable to the savings, this field is left blank.
Natural Gas Usage (MMBtu) Annual Realization Rate	Numeric	The ratio of Verified Gross Savings to Gross Savings, expressed as a decimal. This value indicates the performance of a program's reported Gross Savings relative to actual realized savings. For Alternative Prospective Realization Rates, this value is developed by an independent evaluator and represents the expected realization rate a program would experience from the PA implementing recommended actions detailed in the Gross Savings Analysis.
Con Edison District Steam System Usage (MMBtu) Annual Realization Rate Type	Text	The type of realization rate (either VGS or AP) to be applied against reported gross savings as a result of EM&V activities. A VGS or "Verified Gross Savings" realization rate is reported by an independent evaluator after the energy efficiency program activities and Gross Savings Analysis are complete. An AP or "Alternative Prospective" realization rate is the expected rate a program would experience as a result of the PA implementing recommended actions that are detailed in the Gross Savings Analysis Report. If no realization rate is applicable to the savings, this field is left blank.
Con Edison District Steam System Usage (MMBtu) Annual Realization Rate	Numeric	The ratio of Verified Gross Savings to Gross Savings, expressed as a decimal. This value indicates the performance of a program's reported Gross Savings relative to actual realized savings. For Alternative Prospective Realization Rates, this value is developed by an independent evaluator and represents the expected realization rate a program would experience from the PA implementing recommended actions detailed in the Gross Savings Analysis.

Heating Oil Usage (MMBtu) Annual Realization Rate Type	Text	The type of realization rate (either VGS or AP) to be applied against reported gross savings as a result of EM&V activities. A VGS or "Verified Gross Savings" realization rate is reported by an independent evaluator after the energy efficiency program activities and Gross Savings Analysis are complete. An AP or "Alternative Prospective" realization rate is the expected rate a program would experience as a result of the PA implementing recommended actions that are detailed in the Gross Savings Analysis Report. If no realization rate is applicable to the savings, this field is left blank.
Heating Oil Usage (MMBtu) Annual Realization Rate	Numeric	The ratio of Verified Gross Savings to Gross Savings, expressed as a decimal. This value indicates the performance of a program's reported Gross Savings relative to actual realized savings. For Alternative Prospective Realization Rates, this value is developed by an independent evaluator and represents the expected realization rate a program would experience from the PA implementing recommended actions detailed in the Gross Savings Analysis.
LPG Usage (MMBtu) Annual Realization Rate Type	Text	The type of realization rate (either VGS or AP) to be applied against reported gross savings as a result of EM&V activities. A VGS or "Verified Gross Savings" realization rate is reported by an independent evaluator after the energy efficiency program activities and Gross Savings Analysis are complete. An AP or "Alternative Prospective" realization rate is the expected rate a program would experience as a result of the PA implementing recommended actions that are detailed in the Gross Savings Analysis Report. If no realization rate is applicable to the savings, this field is left blank.
LPG Usage (MMBtu) Annual Realization Rate	Numeric	The ratio of Verified Gross Savings to Gross Savings, expressed as a decimal. This value indicates the performance of a program's reported Gross Savings relative to actual realized savings. For Alternative Prospective Realization Rates, this value is developed by an independent evaluator and represents the expected realization rate a program would experience from the PA implementing recommended actions detailed in the Gross Savings Analysis.
Other Fuel Usage (MMBtu) Annual Realization Rate Type	Text	The type of realization rate (either VGS or AP) to be applied against reported gross savings as a result of EM&V activities. A VGS or "Verified Gross Savings" realization rate is reported by an independent evaluator after the energy efficiency program activities and Gross Savings Analysis are complete. An AP or

		"Alternative Prospective" realization rate is the expected rate a program would experience as a result of the PA implementing recommended actions that are detailed in the Gross Savings Analysis Report. If no realization rate is applicable to the savings, this field is left blank.
Other Fuel Usage (MMBtu) Annual Realization Rate	Numeric	The ratio of Verified Gross Savings to Gross Savings, expressed as a decimal. This value indicates the performance of a program's reported Gross Savings relative to actual realized savings. For Alternative Prospective Realization Rates, this value is developed by an independent evaluator and represents the expected realization rate a program would experience from the PA implementing recommended actions detailed in the Gross Savings Analysis.
Fuel Peak Demand Reductions (MMBtu) Annual Realization Rate Type	Text	The type of realization rate (either VGS or AP) to be applied against reported gross savings as a result of EM&V activities. A VGS or "Verified Gross Savings" realization rate is reported by an independent evaluator after the energy efficiency program activities and Gross Savings Analysis are complete. An AP or "Alternative Prospective" realization rate is the expected rate a program would experience as a result of the PA implementing recommended actions that are detailed in the Gross Savings Analysis Report. If no realization rate is applicable to the savings, this field is left blank.
Fuel Peak Demand Reductions (MMBtu) Annual Realization Rate	Numeric	The ratio of Verified Gross Savings to Gross Savings, expressed as a decimal. This value indicates the performance of a program's reported Gross Savings relative to actual realized savings. For Alternative Prospective Realization Rates, this value is developed by an independent evaluator and represents the expected realization rate a program would experience from the PA implementing recommended actions detailed in the Gross Savings Analysis.
Electricity Peak Demand Reductions (MW) Annual Realization Rate Type	Text	The type of realization rate (either VGS or AP) to be applied against reported gross savings as a result of EM&V activities. A VGS or "Verified Gross Savings" realization rate is reported by an independent evaluator after the energy efficiency program activities and Gross Savings Analysis are complete. An AP or "Alternative Prospective" realization rate is the expected rate a program would experience as a result of the PA implementing recommended actions that are detailed in the Gross Savings Analysis Report. If no realization rate is applicable to the savings, this field is left blank.

Electricity Peak Demand Reductions (MW) Annual Realization Rate	Numeric	The ratio of Verified Gross Savings to Gross Savings, expressed as a decimal. This value indicates the performance of a program's reported Gross Savings relative to actual realized savings. For Alternative Prospective Realization Rates, this value is developed by an independent evaluator and represents the expected realization rate a program would experience from the PA implementing recommended actions detailed in the Gross Savings Analysis.
Renewable Energy Generation (MWh) Annual Realization Rate Type	Text	The type of realization rate (either VGS or AP) to be applied against reported gross savings as a result of EM&V activities. A VGS or "Verified Gross Savings" realization rate is reported by an independent evaluator after the energy efficiency program activities and Gross Savings Analysis are complete. An AP or "Alternative Prospective" realization rate is the expected rate a program would experience as a result of the PA implementing recommended actions that are detailed in the Gross Savings Analysis Report. If no realization rate is applicable to the savings, this field is left blank.
Renewable Energy Generation (MWh) Annual Realization Rate	Numeric	The ratio of Verified Gross Savings to Gross Savings, expressed as a decimal. This value indicates the performance of a program's reported Gross Savings relative to actual realized savings. For Alternative Prospective Realization Rates, this value is developed by an independent evaluator and represents the expected realization rate a program would experience from the PA implementing recommended actions detailed in the Gross Savings Analysis.
Direct Average Program Effective Useful Life (Years) Acquired - Electric	Numeric	Effective Useful Life (EUL) is the median number of years that installed electricity-saving measures are considered effective at reducing energy consumption or demand. The EUL is provided as the program weighted average of all direct electricity-saving measures acquired in the program.
Direct Average Program Effective Useful Life (Years) Committed - Electric	Numeric	Effective Useful Life (EUL) is the median number of years that committed electricity-saving measures are considered effective at reducing energy consumption or demand. The EUL is provided as the program weighted average of all direct electricity-saving measures committed in the program.
Direct Average Program Effective Useful Life (Years) Acquired - Fuel	Numeric	Effective Useful Life (EUL) is the median number of years that installed fuel-saving measures are considered effective at reducing energy consumption or demand. The EUL is provided as the program

		weighted average of all direct fuel-saving measures acquired in the program.
Direct Average Program Effective Useful Life (Years) Committed - Fuel	Numeric	Effective Useful Life (EUL) is the median number of years that committed fuel-saving measures are considered effective at reducing energy consumption or demand. The EUL is provided as the program weighted average of all direct fuel-saving measures committed in the program.
Indirect Average Program Effective Useful Life (Years) Acquired - Electric	Numeric	Effective Useful Life (EUL) is the median number of years that installed electricity-saving measures are considered effective at reducing energy consumption or demand. The EUL is provided as the program weighted average of all indirect electricity-saving measures acquired in the program.
Indirect Average Program Effective Useful Life (Years) Acquired - Fuel	Numeric	Effective Useful Life (EUL) is the median number of years that installed fuel-saving measures are considered effective at reducing energy consumption or demand. The EUL is provided as the program weighted average of all indirect fuel-saving measures acquired in the program.
Direct Annual Electricity Savings (MWh) Acquisitions Planned	Numeric	The annual MWh electricity savings that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Annual Electricity Savings (MWh) Acquisitions Planned to Date	Numeric	The annual MWh electricity savings that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Annual Electricity Savings (MWh) Acquired this Quarter	Numeric	The gross annual MWh electricity savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Electricity Savings (MWh) Acquired this Quarter	Numeric	The verified gross annual MWh electricity savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Electricity Savings (MWh) Acquired this Quarter	Numeric	The annual MWh electricity savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Electricity Savings (MWh) Acquired to Date	Numeric	The gross annual MWh electricity savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Electricity Savings (MWh) Acquired to Date	Numeric	The verified gross annual MWh electricity savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators.

Direct Annual Electricity Savings (MWh) Acquired to Date	Numeric	The annual MWh electricity savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Electricity Savings (MWh) Currently Committed	Numeric	The gross annual MWh electricity savings that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Annual Electricity Savings (MWh) Acquisitions Planned to Date	Numeric	The cumulative annual MWh electricity savings that are planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Annual Electricity Savings (MWh) Acquired to Date	Numeric	The cumulative annual MWh electricity savings that are acquired through the current quarter and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Annual Electricity Usage (MWh) Acquisitions Planned	Numeric	The annual increased MWh consumption associated with fuel-switching that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Annual Electricity Usage (MWh) Acquisitions Planned to Date	Numeric	The annual increased MWh consumption associated with fuel-switching that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Annual Electricity Usage (MWh) Acquired this Quarter	Numeric	The gross annual increased MWh consumption associated with fuel-switching that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Electricity Usage (MWh) Acquired this Quarter	Numeric	The verified gross annual increased MWh consumption associated with fuel-switching that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Electricity Usage (MWh) Acquired this Quarter	Numeric	The annual increased MWh consumption associated with fuel-switching that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Electricity Usage (MWh) Acquired to Date	Numeric	The gross annual increased MWh consumption associated with fuel-switching that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Electricity Usage (MWh) Acquired to Date	Numeric	The verified gross annual increased MWh consumption associated with fuel-switching that are acquired

		through the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Electricity Usage (MWh) Acquired to Date	Numeric	The annual increased MWh consumption associated with fuel-switching that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Electricity Usage (MWh) Currently Committed	Numeric	The gross annual increased MWh consumption associated with fuel-switching that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Annual Electricity Usage (MWh) Acquisitions Planned to Date	Numeric	The cumulative annual increased MWh consumption associated with fuel-switching that are planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Annual Electricity Usage (MWh) Acquired to Date	Numeric	The cumulative annual increased MWh consumption associated with fuel-switching that are acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Annual Natural Gas Savings (MMBtu) Acquisitions Planned	Numeric	The annual MMBtu natural gas savings that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Annual Natural Gas Savings (MMBtu) Acquisitions Planned to Date	Numeric	The annual MMBtu natural gas savings that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Annual Natural Gas Savings (MMBtu) Acquired this Quarter	Numeric	The gross annual MMBtu natural gas savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Natural Gas Savings (MMBtu) Acquired this Quarter	Numeric	The verified gross annual MMBtu natural gas savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Natural Gas Savings (MMBtu) Acquired this Quarter	Numeric	The annual MMBtu natural gas savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Natural Gas Savings (MMBtu) Acquired to Date	Numeric	The gross annual MMBtu natural gas savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators.

Direct Verified Annual Natural Gas Savings (MMBtu) Acquired to Date	Numeric	The verified gross annual MMBtu natural gas savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Natural Gas Savings (MMBtu) Acquired to Date	Numeric	The annual MMBtu natural gas savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Natural Gas Savings (MMBtu) Currently Committed	Numeric	The gross annual MMBtu natural gas savings that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Annual Natural Gas Savings (MMBtu) Acquisitions Planned to Date	Numeric	The cumulative annual MMBtu natural gas savings that are planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Annual Natural Gas Savings (MMBtu) Acquired to Date	Numeric	The cumulative annual MMBtu natural gas savings that are acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Annual Con Edison District Steam System Savings (MMBtu) Acquisitions Planned	Numeric	The annual MMBtu Con Edison District Steam savings that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Annual Con Edison District Steam System Savings (MMBtu) Acquisitions Planned to Date	Numeric	The annual MMBtu Con Edison District Steam savings that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Annual Con Edison District Steam System Savings (MMBtu) Acquired this Quarter	Numeric	The gross annual MMBtu Con Edison District Steam savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Con Edison District Steam System Savings (MMBtu) Acquired this Quarter	Numeric	The verified gross annual MMBtu Con Edison District Steam savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Con Edison District Steam System Savings (MMBtu) Acquired this Quarter	Numeric	The annual MMBtu Con Edison District Steam savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.

Direct Gross Annual Con Edison District Steam System Savings (MMBtu) Acquired to Date	Numeric	The gross annual MMBtu Con Edison District Steam savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Con Edison District Steam System Savings (MMBtu) Acquired to Date	Numeric	The verified gross annual MMBtu Con Edison District Steam savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Con Edison District Steam System Savings (MMBtu) Acquired to Date	Numeric	The annual MMBtu Con Edison District Steam savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Con Edison District Steam System Savings (MMBtu) Currently Committed	Numeric	The gross annual MMBtu Con Edison District Steam savings that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Annual Con Edison District Steam System Savings (MMBtu) Acquisitions Planned to Date	Numeric	The cumulative annual MMBtu Con Edison District Steam savings that are planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Annual Con Edison District Steam System Savings (MMBtu) Acquired to Date	Numeric	The cumulative annual MMBtu Con Edison District Steam savings that are acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Annual Heating Oil Savings (MMBtu) Acquisitions Planned	Numeric	The annual MMBtu heating oil savings that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Annual Heating Oil Savings (MMBtu) Acquisitions Planned to Date	Numeric	The annual MMBtu heating oil savings that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Annual Heating Oil Savings (MMBtu) Acquired this Quarter	Numeric	The gross annual MMBtu heating oil savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Heating Oil Savings (MMBtu) Acquired this Quarter	Numeric	The verified gross annual MMBtu heating oil savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Heating Oil Savings (MMBtu) Acquired this Quarter	Numeric	The annual MMBtu heating oil savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a

		VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Heating Oil Savings (MMBtu) Acquired to Date	Numeric	The gross annual MMBtu heating oil savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Heating Oil Savings (MMBtu) Acquired to Date	Numeric	The verified gross annual MMBtu heating oil savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Heating Oil Savings (MMBtu) Acquired to Date	Numeric	The annual MMBtu heating oil savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Heating Oil Savings (MMBtu) Currently Committed	Numeric	The gross annual MMBtu heating oil savings that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Annual Heating Oil Savings (MMBtu) Acquisitions Planned to Date	Numeric	The cumulative annual MMBtu heating oil savings that are planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Annual Heating Oil Savings (MMBtu) Acquired to Date	Numeric	The cumulative annual MMBtu heating oil savings that are acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Annual LPG Savings (MMBtu) Acquisitions Planned	Numeric	The annual MMBtu LPG savings that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Annual LPG Savings (MMBtu) Acquisitions Planned to Date	Numeric	The annual MMBtu LPG savings that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Annual LPG Savings (MMBtu) Acquired this Quarter	Numeric	The gross annual MMBtu LPG savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual LPG Savings (MMBtu) Acquired this Quarter	Numeric	The verified gross annual MMBtu LPG savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual LPG Savings (MMBtu) Acquired this Quarter	Numeric	The annual MMBtu LPG savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.

Direct Gross Annual LPG Savings (MMBtu) Acquired to Date	Numeric	The gross annual MMBtu LPG savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual LPG Savings (MMBtu) Acquired to Date	Numeric	The verified gross annual MMBtu LPG savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual LPG Savings (MMBtu) Acquired to Date	Numeric	The annual MMBtu LPG savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual LPG Savings (MMBtu) Currently Committed	Numeric	The gross annual MMBtu LPG savings that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Annual LPG Savings (MMBtu) Acquisitions Planned to Date	Numeric	The cumulative annual MMBtu LPG savings that are planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Annual LPG Savings (MMBtu) Acquired to Date	Numeric	The cumulative annual MMBtu LPG savings that are acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Annual Other Fuel Savings (MMBtu) Acquisitions Planned	Numeric	The annual MMBtu other fuel savings that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Annual Other Fuel Savings (MMBtu) Acquisitions Planned to Date	Numeric	The annual MMBtu other fuel savings that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Annual Other Fuel Savings (MMBtu) Acquired this Quarter	Numeric	The gross annual MMBtu other fuel savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Other Fuel Savings (MMBtu) Acquired this Quarter	Numeric	The verified gross annual MMBtu other fuel savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Other Fuel Savings (MMBtu) Acquired this Quarter	Numeric	The annual MMBtu other fuel savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Other Fuel Savings (MMBtu) Acquired to Date	Numeric	The gross annual MMBtu other fuel savings that are acquired through the current quarter and are

		attributable to activities funded by Program Administrators.
Direct Verified Annual Other Fuel Savings (MMBtu) Acquired to Date	Numeric	The verified gross annual MMBtu other fuel savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Other Fuel Savings (MMBtu) Acquired to Date	Numeric	The annual MMBtu other fuel savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Other Fuel Savings (MMBtu) Currently Committed	Numeric	The gross annual MMBtu other fuel savings that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Annual Other Fuel Savings (MMBtu) Acquisitions Planned to Date	Numeric	The cumulative annual MMBtu other fuel savings that are planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Annual Other Fuel Savings (MMBtu) Acquired to Date	Numeric	The cumulative annual MMBtu other fuel savings that are acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Annual Natural Gas Usage (MMBtu) Acquisitions Planned	Numeric	The annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to natural gas that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Annual Natural Gas Usage (MMBtu) Acquisitions Planned to Date	Numeric	The annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to natural gas that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Annual Natural Gas Usage (MMBtu) Acquired this Quarter	Numeric	The gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to natural gas that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Natural Gas Usage (MMBtu) Acquired this Quarter	Numeric	The verified gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to natural gas that are acquired in the current quarter and are attributable to activities funded by Program Administrators.

Direct Annual Natural Gas Usage (MMBtu) Acquired this Quarter	Numeric	The annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to natural gas that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Natural Gas Usage (MMBtu) Acquired to Date	Numeric	The gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to natural gas that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Natural Gas Usage (MMBtu) Acquired to Date	Numeric	The verified gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to natural gas that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Natural Gas Usage (MMBtu) Acquired to Date	Numeric	The annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to natural gas that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Natural Gas Usage (MMBtu) Currently Committed	Numeric	The gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to natural gas that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Annual Natural Gas Usage (MMBtu) Acquisitions Planned to Date	Numeric	The cumulative annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to natural gas that is planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Annual Natural Gas Usage (MMBtu) Acquired to Date	Numeric	The cumulative annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to natural gas that is acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Annual Con Edison District Steam System Usage (MMBtu) Acquisitions Planned	Numeric	The annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Con Edison District Steam System that are planned

		to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Annual Con Edison District Steam System Usage (MMBtu) Acquisitions Planned to Date	Numeric	The annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Con Edison District Steam System that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Annual Con Edison District Steam System Usage (MMBtu) Acquired this Quarter	Numeric	The gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Con Edison District Steam System that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Con Edison District Steam System Usage (MMBtu) Acquired this Quarter	Numeric	The verified gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Con Edison District Steam System that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Con Edison District Steam System Usage (MMBtu) Acquired this Quarter	Numeric	The annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Con Edison District Steam System that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Con Edison District Steam System Usage (MMBtu) Acquired to Date	Numeric	The gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Con Edison District Steam System that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Con Edison District Steam System Usage (MMBtu) Acquired to Date	Numeric	The verified gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Con Edison District Steam System that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Con Edison District Steam System Usage (MMBtu) Acquired to Date	Numeric	The annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Con Edison District Steam System that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.

Direct Gross Annual Con Edison District Steam System Usage (MMBtu) Currently Committed	Numeric	The gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Con Edison District Steam System that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Annual Con Edison District Steam System Usage (MMBtu) Acquisitions Planned to Date	Numeric	The cumulative annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Con Edison District Steam System that is planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Annual Con Edison District Steam System Usage (MMBtu) Acquired to Date	Numeric	The cumulative annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Con Edison District Steam System that is acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Annual Heating Oil Usage (MMBtu) Acquisitions Planned	Numeric	The annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Heating Oil that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Annual Heating Oil Usage (MMBtu) Acquisitions Planned to Date	Numeric	The annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Heating Oil that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Annual Heating Oil Usage (MMBtu) Acquired this Quarter	Numeric	The gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Heating Oil that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Heating Oil Usage (MMBtu) Acquired this Quarter	Numeric	The verified gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Heating Oil that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Heating Oil Usage (MMBtu) Acquired this Quarter	Numeric	The annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Heating Oil that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.

Direct Gross Annual Heating Oil Usage (MMBtu) Acquired to Date	Numeric	The gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Heating Oil that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Heating Oil Usage (MMBtu) Acquired to Date	Numeric	The verified gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Heating Oil that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Heating Oil Usage (MMBtu) Acquired to Date	Numeric	The annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Heating Oil that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Heating Oil Usage (MMBtu) Currently Committed	Numeric	The gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Heating Oil that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Annual Heating Oil Usage (MMBtu) Acquisitions Planned to Date	Numeric	The cumulative annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Heating Oil that is planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Annual Heating Oil Usage (MMBtu) Acquired to Date	Numeric	The cumulative annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to Heating Oil that is acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Annual LPG Usage (MMBtu) Acquisitions Planned	Numeric	The annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to LPG that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Annual LPG Usage (MMBtu) Acquisitions Planned to Date	Numeric	The annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to LPG that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.

Direct Gross Annual LPG Usage (MMBtu) Acquired this Quarter	Numeric	The gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to LPG that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual LPG Usage (MMBtu) Acquired this Quarter	Numeric	The verified gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to LPG that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual LPG Usage (MMBtu) Acquired this Quarter	Numeric	The annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to LPG that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual LPG Usage (MMBtu) Acquired to Date	Numeric	The gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to LPG that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual LPG Usage (MMBtu) Acquired to Date	Numeric	The verified gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to LPG that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual LPG Usage (MMBtu) Acquired to Date	Numeric	The annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to LPG that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual LPG Usage (MMBtu) Currently Committed	Numeric	The gross annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to LPG that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Annual LPG Usage (MMBtu) Acquisitions Planned to Date	Numeric	The cumulative annual increased MMBtu consumption associated with fuel-switching from electricity or another fuel type to LPG that is planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Annual LPG Usage (MMBtu) Acquired to Date	Numeric	The cumulative annual increased MMBtu consumption associated with fuel-switching from electricity or

		another fuel type to LPG that is acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Annual Other Fuel Usage (MMBtu) Acquisitions Planned	Numeric	The annual increased an other fuel (other than natural gas, LPG, heating oil, Con Edison district steam, MMBtu consumption associated with fuel-switching to a fuel other than natural gas, LPG, heating oil, Con Edison district steam, that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Annual Other Fuel Usage (MMBtu) Acquisitions Planned to Date	Numeric	The annual increased an other fuel (other than natural gas, LPG, heating oil, Con Edison district steam, MMBtu consumption associated with fuel-switching to a fuel other than natural gas, LPG, heating oil, Con Edison district steam, that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Annual Other Fuel Usage (MMBtu) Acquired this Quarter	Numeric	The gross annual increased MMBtu consumption associated with fuel-switching to a fuel other than natural gas, LPG, heating oil, Con Edison district steam, that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Other Fuel Usage (MMBtu) Acquired this Quarter	Numeric	The verified gross annual increased MMBtu consumption associated with fuel-switching to a fuel other than natural gas, LPG, heating oil, Con Edison district steam, that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Other Fuel Usage (MMBtu) Acquired this Quarter	Numeric	The annual increased MMBtu consumption associated with fuel-switching to a fuel other than natural gas, LPG, heating oil, Con Edison district steam, that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Other Fuel Usage (MMBtu) Acquired to Date	Numeric	The gross annual increased MMBtu consumption associated with fuel-switching to a fuel other than natural gas, LPG, heating oil, Con Edison district steam, that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Other Fuel Usage (MMBtu) Acquired to Date	Numeric	The verified gross annual increased MMBtu consumption associated with fuel-switching to a fuel other than natural gas, LPG, heating oil, Con Edison

		district steam, that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Other Fuel Usage (MMBtu) Acquired to Date	Numeric	The annual increased MMBtu consumption associated with fuel-switching to a fuel other than natural gas, LPG, heating oil, Con Edison district steam, that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Other Fuel Usage (MMBtu) Currently Committed	Numeric	The gross annual increased MMBtu consumption associated with fuel-switching to a fuel other than natural gas, LPG, heating oil, Con Edison district steam, that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Annual Other Fuel Usage (MMBtu) Acquisitions Planned to Date	Numeric	The cumulative annual increased MMBtu consumption associated with fuel-switching to a fuel other than natural gas, LPG, heating oil, Con Edison district steam, that is planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Annual Other Fuel Usage (MMBtu) Acquired to Date	Numeric	The cumulative annual increased MMBtu consumption associated with fuel-switching to a fuel other than natural gas, LPG, heating oil, Con Edison district steam, that is acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Annual Total Energy Savings (MMBtu equivalent) Acquisitions Planned	Numeric	The planned acquired annual energy savings from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of Annual Electricity Savings (MWh) and Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus Annual Fuel Savings (MMBtu) and Annual Fuel Usage (MMBtu).
Direct Annual Total Energy Savings (MMBtu equivalent) Acquisitions Planned to Date	Numeric	The planned to date acquired annual energy savings from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of Annual Electricity Savings (MWh) and Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus Annual Fuel Savings (MMBtu) and Annual Fuel Usage (MMBtu).
Direct Gross Annual Total Energy Savings (MMBtu	Numeric	The gross annual energy savings acquired this quarter from both electric and fuel saving measures, measured

equivalent) Acquired this Quarter		in millions of British thermal units (MMBtus). This metric is equal to the sum of Gross Annual Electricity Savings (MWh) and Gross Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus Gross Annual Fuel Savings (MMBtu) and Gross Annual Fuel Usage (MMBtu).
Direct Verified Annual Total Energy Savings (MMBtu equivalent) Acquired this Quarter	Numeric	The verified gross annual energy savings acquired this quarter from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of verified gross Annual Electricity Savings (MWh) and verified gross Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus verified gross Annual Fuel Savings (MMBtu) and verified gross Annual Fuel Usage (MMBtu).
Direct Annual Total Energy Savings (MMBtu equivalent) Acquired this Quarter	Numeric	The annual energy savings acquired this quarter from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of Gross Annual Electricity Savings (MWh) and Gross Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus Gross Annual Fuel Savings (MMBtu) and Gross Annual Fuel Usage (MMBtu). Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Total Energy Savings (MMBtu equivalent) Acquired to Date	Numeric	The acquired to date gross annual energy savings from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of Gross Annual Electricity Savings (MWh) and Gross Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus Gross Annual Fuel Savings (MMBtu) and Gross Annual Fuel Usage (MMBtu).
Direct Verified Annual Total Energy Savings (MMBtu equivalent) Acquired to Date	Numeric	The acquired to date verified gross annual energy savings from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of verified gross Annual Electricity Savings (MWh) and verified gross Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus verified gross Annual Fuel Savings (MMBtu) and verified gross Annual Fuel Usage (MMBtu).
Direct Annual Total Energy Savings (MMBtu equivalent) Acquired to Date	Numeric	The acquired to date annual energy savings from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of Gross Annual Electricity Savings (MWh) and Gross Annual Electricity Usage (MWh), multiplied

		by a MWh to MMBtu conversion factor of 3.412, plus Gross Annual Fuel Savings (MMBtu) and Gross Annual Fuel Usage (MMBtu). Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Total Energy Savings (MMBtu equivalent) Currently Committed	Numeric	The currently committed annual energy savings from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of Gross Annual Electricity Savings (MWh) and Gross Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus Gross Annual Fuel Savings (MMBtu) and Gross Annual Fuel Usage (MMBtu).
Indirect Annual Total Energy Savings (MMBtu equivalent) Acquisitions Planned to Date	Numeric	The indirect planned to date acquired annual energy savings from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of Annual Electricity Savings (MWh) and Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus Annual Fuel Savings (MMBtu) and Annual Fuel Usage (MMBtu).
Indirect Annual Total Energy Savings (MMBtu equivalent) Acquired to Date	Numeric	The indirect acquired to date annual energy savings from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of Gross Annual Electricity Savings (MWh) and Gross Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus Gross Annual Fuel Savings (MMBtu) and Gross Annual Fuel Usage (MMBtu).
Direct Fuel Peak Demand Reductions (MMBtu) Acquisitions Planned	Numeric	The gas reduction, in MMBTU/day, after installation of energy efficiency measures coincident with the peak day for a given natural gas utility that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Fuel Peak Demand Reductions (MMBtu) Acquisitions Planned to Date	Numeric	The gas reduction, in MMBTU/day, after installation of energy efficiency measures coincident with the peak day for a given natural gas utility that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Fuel Peak Demand Reductions (MMBtu) Acquired this Quarter	Numeric	The gross gas reduction, in MMBTU/day, after installation of energy efficiency measures coincident with the peak day for a given natural gas utility that are acquired in the current quarter and are attributable to activities funded by Program Administrators.

Direct Verified Fuel Peak Demand Reductions (MMBtu) Acquired this Quarter	Numeric	The verified gross gas reduction, in MMBTU/day, after installation of energy efficiency measures coincident with the peak day for a given natural gas utility that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Fuel Peak Demand Reductions (MMBtu) Acquired this Quarter	Numeric	The gas reduction, in MMBTU/day, after installation of energy efficiency measures coincident with the peak day for a given natural gas utility that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Fuel Peak Demand Reductions (MMBtu) Acquired to Date	Numeric	The gross gas reduction, in MMBTU/day, after installation of energy efficiency measures coincident with the peak day for a given natural gas utility that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Fuel Peak Demand Reductions (MMBtu) Acquired to Date	Numeric	The verified gross gas reduction, in MMBTU/day, after installation of energy efficiency measures coincident with the peak day for a given natural gas utility that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Fuel Peak Demand Reductions (MMBtu) Acquired to Date	Numeric	The gas reduction, in MMBTU/day, after installation of energy efficiency measures coincident with the peak day for a given natural gas utility that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Fuel Peak Demand Reductions (MMBtu) Currently Committed	Numeric	The gross gas reduction, in MMBTU/day, after installation of energy efficiency measures coincident with the peak day for a given natural gas utility that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Direct Electricity Peak Demand Reductions (MW) Acquisitions Planned	Numeric	The MW system peak demand reduction that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Electricity Peak Demand Reductions (MW) Acquisitions Planned to Date	Numeric	The MW system peak demand reduction that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.

Direct Gross Electricity Peak Demand Reductions (MW) Acquired this Quarter	Numeric	The gross MW system peak demand reduction that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Electricity Peak Demand Reductions (MW) Acquired this Quarter	Numeric	The verified gross MW system peak demand reduction that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Electricity Peak Demand Reductions (MW) Acquired this Quarter	Numeric	The MW system peak demand reduction that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Electricity Peak Demand Reductions (MW) Acquired to Date	Numeric	The gross MW system peak demand reduction that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Electricity Peak Demand Reductions (MW) Acquired to Date	Numeric	The verified gross MW system peak demand reduction that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Electricity Peak Demand Reductions (MW) Acquired to Date	Numeric	The MW system peak demand reduction that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Electricity Peak Demand Reductions (MW) Currently Committed	Numeric	The gross MW system peak demand reduction that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Renewable Energy Generation (MWh) Acquisitions Planned	Numeric	The annual MWh electricity generated from renewable energy measures that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Annual Renewable Energy Generation (MWh) Acquisitions Planned to Date	Numeric	The annual MWh electricity generated from renewable energy measures that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Annual Renewable Energy Generation (MWh) Acquired this Quarter	Numeric	The gross annual MWh electricity generated from renewable energy measures that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Renewable Energy Generation (MWh) Acquired this Quarter	Numeric	The verified gross annual MWh electricity generated from renewable energy measures that are acquired in the current quarter and are attributable to activities funded by Program Administrators.

Direct Annual Renewable Energy Generation (MWh) Acquired this Quarter	Numeric	The annual MWh electricity generated from renewable energy measures that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Renewable Energy Generation (MWh) Acquired to Date	Numeric	The gross annual MWh electricity generated from renewable energy measures that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Renewable Energy Generation (MWh) Acquired to Date	Numeric	The verified gross annual MWh electricity generated from renewable energy measures that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Renewable Energy Generation (MWh) Acquired to Date	Numeric	The annual MWh electricity generated from renewable energy measures that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Annual Renewable Energy Generation (MWh) Currently Committed	Numeric	The gross annual MWh electricity generated from renewable energy measures that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Annual Renewable Energy Generation (MWh) Acquisitions Planned to Date	Numeric	The cumulative annual MWh electricity generated from renewable energy measures that are planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Annual Renewable Energy Generation (MWh) Acquired to Date	Numeric	The cumulative annual MWh electricity generated from renewable energy measures that are acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Renewable Energy Capacity (MW) Acquisitions Planned	Numeric	The capacity in MW of renewable energy measures that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Renewable Energy Capacity (MW) Acquisitions Planned to Date	Numeric	The capacity in MW of renewable energy measures that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Renewable Energy Capacity (MW) Acquired this Quarter	Numeric	The gross capacity in MW of renewable energy measures that are acquired in the current quarter and are attributable to activities funded by Program Administrators.

Direct Gross Renewable Energy Capacity (MW) Acquired to Date	Numeric	The gross capacity in MW of renewable energy measures that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Renewable Energy Capacity (MW) Currently Committed	Numeric	The gross capacity in MW of renewable energy measures that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Renewable Energy Capacity (MW) Acquisitions Planned to Date	Numeric	The cumulative capacity in MW of renewable energy measures that are planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Renewable Energy Capacity (MW) Acquired to Date	Numeric	The cumulative capacity in MW of renewable energy measures that are acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Annual CO2e Emission Reductions (Metric Tons) Acquisitions Planned	Numeric	The annual carbon emission reductions in CO2 equivalent metric tons that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Annual CO2e Emission Reductions (Metric Tons) Acquisitions Planned to Date	Numeric	The annual carbon emission reductions in CO2 equivalent metric tons that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Annual CO2e Emission Reductions (Metric Tons) Acquired this Quarter	Numeric	The gross annual carbon emission reductions in CO2 equivalent metric tons that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual CO2e Emission Reductions (Metric Tons) Acquired this Quarter	Numeric	The verified gross annual carbon emission reductions in CO2 equivalent metric tons that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual CO2e Emission Reductions (Metric Tons) Acquired this Quarter	Numeric	The annual carbon emission reductions in CO2 equivalent metric tons that are acquired in the current quarter and are attributable to activities funded by Program Administrators. These values are calculated off of verified gross values, where available.
Direct Gross Annual CO2e Emission Reductions (Metric Tons) Acquired to Date	Numeric	The gross annual carbon emission reductions in CO2 equivalent metric tons that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual CO2e Emission Reductions (Metric Tons) Acquired to Date	Numeric	The verified gross annual carbon emission reductions in CO2 equivalent metric tons that are acquired through the current quarter and are attributable to activities funded by Program Administrators.

Direct Annual CO2e Emission Reductions (Metric Tons) Acquired to Date	Numeric	The annual carbon emission reductions in CO2 equivalent metric tons that are acquired through the current quarter and are attributable to activities funded by Program Administrators. These values are calculated off of verified gross values, where available.
Direct Gross Annual CO2e Emission Reductions (Metric Tons) Currently Committed	Numeric	The gross annual carbon emission reductions in CO2 equivalent metric tons that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Annual CO2e Emission Reductions (Metric Tons) Acquisitions Planned to Date	Numeric	The cumulative annual carbon emission reductions in CO2 equivalent metric tons that are planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Annual CO2e Emission Reductions (Metric Tons) Acquired to Date	Numeric	The cumulative annual carbon emission reductions in CO2 equivalent metric tons that are acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Annual Participant Bill Savings (Dollars) Acquisitions Planned	Currency	The annual estimated bill savings (in dollars) for program participants that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Annual Participant Bill Savings (Dollars) Acquisitions Planned to Date	Currency	The annual estimated bill savings (in dollars) for program participants that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Annual Participant Bill Savings (Dollars) Acquired this Quarter	Currency	The gross annual estimated bill savings (in dollars) for program participants that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Participant Bill Savings (Dollars) Acquired this Quarter	Currency	The verified gross annual estimated bill savings (in dollars) for program participants that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Participant Bill Savings (Dollars) Acquired this Quarter	Currency	The annual estimated bill savings (in dollars) for program participants that are acquired in the current quarter and are attributable to activities funded by Program Administrators. These values are calculated off of verified gross values, where available.
Direct Gross Annual Participant Bill Savings (Dollars) Acquired to Date	Currency	The gross annual estimated bill savings (in dollars) for program participants that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Annual Participant Bill Savings (Dollars) Acquired to Date	Currency	The verified gross annual estimated bill savings (in dollars) for program participants that are acquired

		through the current quarter and are attributable to activities funded by Program Administrators.
Direct Annual Participant Bill Savings (Dollars) Acquired to Date	Currency	The annual estimated bill savings (in dollars) for program participants that are acquired through the current quarter and are attributable to activities funded by Program Administrators. These values are calculated off of verified gross values, where available.
Direct Gross Annual Participant Bill Savings (Dollars) Currently Committed	Currency	The gross annual estimated bill savings (in dollars) for program participants that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Annual Participant Bill Savings (Dollars) Acquired to Date	Currency	The cumulative annual estimated bill savings (in dollars) that are acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Leveraged Funds (Dollars) Acquisitions Planned	Currency	Total estimated non-ratepayer funds (in dollars), both private and public, including customer out-of-pocket costs, that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Leveraged Funds (Dollars) Acquisitions Planned to Date	Currency	Total estimated non-ratepayer funds (in dollars), both private and public, including customer out-of-pocket costs, that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Leveraged Funds (Dollars) Acquired this Quarter	Currency	Total estimated non-ratepayer funds (in dollars), both private and public, including customer out-of-pocket costs, that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Leveraged Funds (Dollars) Acquired to Date	Currency	Total estimated non-ratepayer funds (in dollars), both private and public, including customer out-of-pocket costs, that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Leveraged Funds (Dollars) Currently Committed	Currency	Total estimated non-ratepayer funds (in dollars), both private and public, including customer out-of-pocket costs, that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Leveraged Funds (Dollars) Acquired to Date	Currency	Total estimated non-ratepayer funds (in dollars), both private and public, including customer out-of-pocket costs, that are acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Participants (Count) Acquisitions Planned	Numeric	Number of entities or individuals for which incentives or services resulted in engagement and/or savings that

		are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Participants (Count) Acquisitions Planned to Date	Numeric	Number of entities or individuals for which incentives or services resulted in engagement and/or savings that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Participants (Count) Acquired this Quarter	Numeric	Number of entities or individuals for which incentives or services resulted in engagement and/or savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Participants (Count) Acquired to Date	Numeric	Number of entities or individuals for which incentives or services resulted in engagement and/or savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Participants (Count) Currently Committed	Numeric	Number of entities or individuals for which incentives or services resulted in engagement and/or savings that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Direct Lifetime Electricity Savings (MWh) Acquisitions Planned	Numeric	The lifetime MWh electricity savings that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Lifetime Electricity Savings (MWh) Acquisitions Planned to Date	Numeric	The lifetime MWh electricity savings that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Lifetime Electricity Savings (MWh) Acquired this Quarter	Numeric	The gross lifetime MWh electricity savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Lifetime Electricity Savings (MWh) Acquired this Quarter	Numeric	The verified gross lifetime MWh electricity savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Lifetime Electricity Savings (MWh) Acquired this Quarter	Numeric	The lifetime MWh electricity savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Lifetime Electricity Savings (MWh) Acquired to Date	Numeric	The gross lifetime MWh electricity savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Lifetime Electricity Savings (MWh) Acquired to Date	Numeric	The verified gross lifetime MWh electricity savings that are acquired through the current quarter and are

		attributable to activities funded by Program Administrators.
Direct Lifetime Electricity Savings (MWh) Acquired to Date	Numeric	The lifetime MWh electricity savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Lifetime Electricity Savings (MWh) Currently Committed	Numeric	The gross lifetime MWh electricity savings that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Lifetime Electricity Savings (MWh) Acquisitions Planned to Date	Numeric	The cumulative lifetime MWh electricity savings that are planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Lifetime Electricity Savings (MWh) Acquired to Date	Numeric	The cumulative lifetime MWh electricity savings that are acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Lifetime Electricity Usage (MWh) Acquisitions Planned	Numeric	The lifetime increased MWh consumption associated with fuel-switching that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Lifetime Electricity Usage (MWh) Acquisitions Planned to Date	Numeric	The lifetime increased MWh consumption associated with fuel-switching that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Lifetime Electricity Usage (MWh) Acquired this Quarter	Numeric	The gross lifetime increased MWh consumption associated with fuel-switching that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Lifetime Electricity Usage (MWh) Acquired this Quarter	Numeric	The verified gross lifetime increased MWh consumption associated with fuel-switching that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Lifetime Electricity Usage (MWh) Acquired this Quarter	Numeric	The lifetime increased MWh consumption associated with fuel-switching that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Lifetime Electricity Usage (MWh) Acquired to Date	Numeric	The gross lifetime increased MWh consumption associated with fuel-switching that are acquired through the current quarter and are attributable to activities funded by Program Administrators.

Direct Verified Lifetime Electricity Usage (MWh) Acquired to Date	Numeric	The verified gross lifetime increased MWh consumption associated with fuel-switching that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Lifetime Electricity Usage (MWh) Acquired to Date	Numeric	The lifetime increased MWh consumption associated with fuel-switching that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Lifetime Electricity Usage (MWh) Currently Committed	Numeric	The gross lifetime increased MWh consumption associated with fuel-switching that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Lifetime Electricity Usage (MWh) Acquisitions Planned to Date	Numeric	The cumulative lifetime increased MWh consumption associated with fuel-switching that are planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Lifetime Electricity Usage (MWh) Acquired to Date	Numeric	The cumulative lifetime increased MWh consumption associated with fuel-switching that are acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Lifetime Fuel Savings (MMBtu) Acquisitions Planned	Numeric	The lifetime MMBtu fuel savings that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Lifetime Fuel Savings (MMBtu) Acquisitions Planned to Date	Numeric	The lifetime MMBtu fuel savings that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Lifetime Fuel Savings (MMBtu) Acquired this Quarter	Numeric	The gross lifetime MMBtu fuel savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Lifetime Fuel Savings (MMBtu) Acquired this Quarter	Numeric	The verified gross lifetime MMBtu fuel savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Lifetime Fuel Savings (MMBtu) Acquired this Quarter	Numeric	The lifetime MMBtu fuel savings that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Lifetime Fuel Savings (MMBtu) Acquired to Date	Numeric	The gross lifetime MMBtu fuel savings that are acquired through the current quarter and are

		attributable to activities funded by Program Administrators.
Direct Verified Lifetime Fuel Savings (MMBtu) Acquired to Date	Numeric	The verified gross lifetime MMBtu fuel savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Lifetime Fuel Savings (MMBtu) Acquired to Date	Numeric	The lifetime MMBtu fuel savings that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Lifetime Fuel Savings (MMBtu) Currently Committed	Numeric	The gross lifetime MMBtu fuel savings that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Lifetime Fuel Savings (MMBtu) Acquisitions Planned to Date	Numeric	The cumulative lifetime MMBtu fuel savings that are planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Lifetime Fuel Savings (MMBtu) Acquired to Date	Numeric	The cumulative lifetime MMBtu fuel savings that are acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Lifetime Fuel Usage (MMBtu) Acquisitions Planned	Numeric	The lifetime increased fuel consumption in MMBtus that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Lifetime Fuel Usage (MMBtu) Acquisitions Planned to Date	Numeric	The lifetime increased fuel consumption in MMBtus that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Lifetime Fuel Usage (MMBtu) Acquired this Quarter	Numeric	The gross lifetime increased fuel consumption in MMBtus that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Lifetime Fuel Usage (MMBtu) Acquired this Quarter	Numeric	The verified gross lifetime increased fuel consumption in MMBtus that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Lifetime Fuel Usage (MMBtu) Acquired this Quarter	Numeric	The lifetime increased fuel consumption in MMBtus that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.

Direct Gross Lifetime Fuel Usage (MMBtu) Acquired to Date	Numeric	The gross lifetime increased fuel consumption in MMBtus that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Lifetime Fuel Usage (MMBtu) Acquired to Date	Numeric	The verified gross lifetime increased fuel consumption in MMBtus that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Lifetime Fuel Usage (MMBtu) Acquired to Date	Numeric	The lifetime increased fuel consumption in MMBtus that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Lifetime Fuel Usage (MMBtu) Currently Committed	Numeric	The gross lifetime increased fuel consumption in MMBtus that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Lifetime Fuel Usage (MMBtu) Acquisitions Planned to Date	Numeric	The cumulative lifetime increased fuel consumption in MMBtus that is planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Lifetime Fuel Usage (MMBtu) Acquired to Date	Numeric	The cumulative lifetime increased fuel consumption in MMBtu that is acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Lifetime Total Energy Savings (MMBtu equivalent) Acquisitions Planned	Numeric	The planned acquired lifetime energy savings from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of Annual Electricity Savings (MWh) and Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus Annual Fuel Savings (MMBtu) and Annual Fuel Usage (MMBtu).
Direct Lifetime Total Energy Savings (MMBtu equivalent) Acquisitions Planned to Date	Numeric	The planned to date acquired lifetime energy savings from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of Annual Electricity Savings (MWh) and Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus Annual Fuel Savings (MMBtu) and Annual Fuel Usage (MMBtu).
Direct Gross Lifetime Total Energy Savings (MMBtu equivalent) Acquired this Quarter	Numeric	The gross lifetime energy savings acquired this quarter from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of Gross Annual Electricity Savings (MWh) and Gross Annual Electricity Usage

		(MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus Gross Annual Fuel Savings (MMBtu) and Gross Annual Fuel Usage (MMBtu).
Direct Verified Lifetime Total Energy Savings (MMBtu equivalent) Acquired this Quarter	Numeric	The verified gross lifetime energy savings acquired this quarter from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of verified gross Annual Electricity Savings (MWh) and verified gross Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus verified gross Annual Fuel Savings (MMBtu) and verified gross Annual Fuel Usage (MMBtu).
Direct Lifetime Total Energy Savings (MMBtu equivalent) Acquired this Quarter	Numeric	The lifetime energy savings acquired this quarter from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of Annual Electricity Savings (MWh) and Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus Annual Fuel Savings (MMBtu) and Annual Fuel Usage (MMBtu). This field is calculated off of verified gross values, where available, and where they are not, is calculated off of gross values.
Direct Gross Lifetime Total Energy Savings (MMBtu equivalent) Acquired to Date	Numeric	The acquired to date gross lifetime energy savings from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of Gross Annual Electricity Savings (MWh) and Gross Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus Gross Annual Fuel Savings (MMBtu) and Gross Annual Fuel Usage (MMBtu).
Direct Verified Lifetime Total Energy Savings (MMBtu equivalent) Acquired to Date	Numeric	The acquired to date verified gross lifetime energy savings from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of verified gross Annual Electricity Savings (MWh) and verified gross Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus verified gross Annual Fuel Savings (MMBtu) and verified gross Annual Fuel Usage (MMBtu).
Direct Lifetime Total Energy Savings (MMBtu equivalent) Acquired to Date	Numeric	The acquired to date lifetime energy savings from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of Annual Electricity Savings (MWh) and Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus Annual Fuel Savings (MMBtu) and Annual Fuel Usage (MMBtu). This field is calculated off of verified gross values, where

		available, and where they are not, is calculated off of gross values.
Direct Gross Lifetime Total Energy Savings (MMBtu equivalent) Currently Committed	Numeric	The currently committed lifetime energy savings from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of Gross Annual Electricity Savings (MWh) and Gross Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus Gross Annual Fuel Savings (MMBtu) and Gross Annual Fuel Usage (MMBtu).
Indirect Lifetime Total Energy Savings (MMBtu equivalent) Acquisitions Planned to Date	Numeric	The indirect planned to date acquired lifetime energy savings from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of Annual Electricity Savings (MWh) and Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus Annual Fuel Savings (MMBtu) and Annual Fuel Usage (MMBtu).
Indirect Lifetime Total Energy Savings (MMBtu equivalent) Acquired to Date	Numeric	The indirect acquired to date lifetime energy savings from both electric and fuel saving measures, measured in millions of British thermal units (MMBtus). This metric is equal to the sum of Gross Annual Electricity Savings (MWh) and Gross Annual Electricity Usage (MWh), multiplied by a MWh to MMBtu conversion factor of 3.412, plus Gross Annual Fuel Savings (MMBtu) and Gross Annual Fuel Usage (MMBtu).
Direct Lifetime Renewable Energy Generation (MWh) Acquisitions Planned	Numeric	The lifetime MWh electricity generated from renewable energy measures that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Lifetime Renewable Energy Generation (MWh) Acquisitions Planned to Date	Numeric	The lifetime MWh electricity generated from renewable energy measures that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Lifetime Renewable Energy Generation (MWh) Acquired this Quarter	Numeric	The gross lifetime MWh electricity generated from renewable energy measures that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Lifetime Renewable Energy Generation (MWh) Acquired this Quarter	Numeric	The verified gross lifetime MWh electricity generated from renewable energy measures that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Lifetime Renewable Energy Generation (MWh) Acquired this Quarter	Numeric	The lifetime MWh electricity generated from renewable energy measures that are acquired in the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is

		available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Lifetime Renewable Energy Generation (MWh) Acquired to Date	Numeric	The gross lifetime MWh electricity generated from renewable energy measures that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Lifetime Renewable Energy Generation (MWh) Acquired to Date	Numeric	The verified gross lifetime MWh electricity generated from renewable energy measures that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Lifetime Renewable Energy Generation (MWh) Acquired to Date	Numeric	The lifetime MWh electricity generated from renewable energy measures that are acquired through the current quarter and are attributable to activities funded by Program Administrators. Where a VGS or AP RR is available, that value is used here. If a VGS or AP RR is not available, a gross value is shown here.
Direct Gross Lifetime Renewable Energy Generation (MWh) Currently Committed	Numeric	The gross lifetime MWh electricity generated from renewable energy measures that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Lifetime Renewable Energy Generation (MWh) Acquisitions Planned to Date	Numeric	The cumulative lifetime MWh electricity generated from renewable energy measures that are planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Lifetime Renewable Energy Generation (MWh) Acquired to Date	Numeric	The cumulative lifetime MWh electricity generated from renewable energy measures that are acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Lifetime CO2e Emission Reductions (Metric Tons) Acquisitions Planned	Numeric	The lifetime carbon emission reductions in CO2 equivalent metric tons that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Lifetime CO2e Emission Reductions (Metric Tons) Acquisitions Planned to Date	Numeric	The lifetime carbon emission reductions in CO2 equivalent metric tons that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Lifetime CO2e Emission Reductions (Metric Tons) Acquired this Quarter	Numeric	The gross lifetime carbon emission reductions in CO2 equivalent metric tons that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Lifetime CO2e Emission Reductions (Metric Tons) Acquired this Quarter	Numeric	The verified gross lifetime carbon emission reductions in CO2 equivalent metric tons that are acquired in the current quarter and are attributable to activities funded by Program Administrators.

Direct Lifetime CO2e Emission Reductions (Metric Tons) Acquired this Quarter	Numeric	The lifetime carbon emission reductions in CO2 equivalent metric tons that are acquired in the current quarter and are attributable to activities funded by Program Administrators. These values are calculated off of verified gross values, where available.
Direct Gross Lifetime CO2e Emission Reductions (Metric Tons) Acquired to Date	Numeric	The gross lifetime carbon emission reductions in CO2 equivalent metric tons that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Lifetime CO2e Emission Reductions (Metric Tons) Acquired to Date	Numeric	The verified gross lifetime carbon emission reductions in CO2 equivalent metric tons that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Lifetime CO2e Emission Reductions (Metric Tons) Acquired to Date	Numeric	The lifetime carbon emission reductions in CO2 equivalent metric tons that are acquired through the current quarter and are attributable to activities funded by Program Administrators. These values are calculated off of verified gross values, where available.
Direct Gross Lifetime CO2e Emission Reductions (Metric Tons) Currently Committed	Numeric	The gross lifetime carbon emission reductions in CO2 equivalent metric tons that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Lifetime CO2e Emission Reductions (Metric Tons) Acquisitions Planned to Date	Numeric	The cumulative lifetime carbon emission reductions in CO2 equivalent metric tons that are planned to be acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Indirect Lifetime CO2e Emission Reductions (Metric Tons) Acquired to Date	Numeric	The cumulative lifetime carbon emission reductions in CO2 equivalent metric tons that are acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Direct Lifetime Participant Bill Savings (Dollars) Acquisitions Planned	Currency	The lifetime estimated bill savings (in dollars) for program participants that are planned to be acquired for the current year and are attributable to activities funded by Program Administrators.
Direct Lifetime Participant Bill Savings (Dollars) Acquisitions Planned to Date	Currency	The lifetime estimated bill savings (in dollars) for program participants that are planned to be acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Gross Lifetime Participant Bill Savings (Dollars) Acquired this Quarter	Currency	The gross lifetime estimated bill savings (in dollars) for program participants that are acquired in the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Lifetime Participant Bill Savings (Dollars) Acquired this Quarter	Currency	The verified gross lifetime estimated bill savings (in dollars) for program participants that are acquired in

		the current quarter and are attributable to activities funded by Program Administrators.
Direct Lifetime Participant Bill Savings (Dollars) Acquired this Quarter	Currency	The lifetime estimated bill savings (in dollars) for program participants that are acquired in the current quarter and are attributable to activities funded by Program Administrators. These values are calculated off of verified gross values, where available.
Direct Gross Lifetime Participant Bill Savings (Dollars) Acquired to Date	Currency	The gross lifetime estimated bill savings (in dollars) for program participants that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Verified Lifetime Participant Bill Savings (Dollars) Acquired to Date	Currency	The verified gross lifetime estimated bill savings (in dollars) for program participants that are acquired through the current quarter and are attributable to activities funded by Program Administrators.
Direct Lifetime Participant Bill Savings (Dollars) Acquired to Date	Currency	The lifetime estimated bill savings (in dollars) for program participants that are acquired through the current quarter and are attributable to activities funded by Program Administrators. These values are calculated off of verified gross values, where available.
Direct Gross Lifetime Participant Bill Savings (Dollars) Currently Committed	Currency	The gross lifetime estimated bill savings (in dollars) for program participants that are committed (but not acquired) in the current quarter and are attributable to activities funded by Program Administrators.
Indirect Lifetime Participant Bill Savings (Dollars) Acquired to Date	Currency	The cumulative lifetime estimated bill savings (in dollars) that are acquired through the current year and are due to longer-term market effects from follow-on activity not directly funded by Program Administrators.
Annual Incentives and Services (Dollars) Expenditures Budget	Currency	Funds that are planned to be spent in the current year on incentives/rebates paid to customers and payments made directly to contractors for specific projects and services such as energy audits.
Annual Incentives and Services (Dollars) Expenditures Budget to Date	Currency	Funds that are planned to be spent through the current quarter on incentives/rebates paid to customers and payments made directly to contractors for specific projects and services such as energy audits.
Incentives and Services (Dollars) Expenditures this Quarter	Currency	Funds spent in the current quarter on incentives/rebates paid to customers and payments made directly to contractors for specific projects and services such as energy audits.
Incentives and Services (Dollars) Expenditures to Date	Currency	Funds spent through the current quarter on incentives/rebates paid to customers and payments made directly to contractors for specific projects and services such as energy audits.
Incentives and Services (Dollars) Currently Encumbered	Currency	Funds encumbered (but not expended) in the current quarter for incentives/rebates paid to customers and

		payments made directly to contractors for specific projects and services such as energy audits.
Annual Implementation (Dollars) Expenditures Budget	Currency	Funds that are planned to be spent in the current year on program implementation or technical support, which includes costs associated with contractors implementing programs on the administrator's behalf or other costs associated with implementation of the program.
Annual Implementation (Dollars) Expenditures Budget to Date	Currency	Funds that are planned to be spent through the current quarter on program implementation or technical support, which includes costs associated with contractors implementing programs on the administrator's behalf or other costs associated with implementation of the program.
Implementation (Dollars) Expenditures this Quarter	Currency	Funds spent in the current quarter on program implementation or technical support, which includes costs associated with contractors implementing programs on the administrator's behalf or other costs associated with implementation of the program.
Implementation (Dollars) Expenditures to Date	Currency	Funds spent through the current quarter on program implementation or technical support, which includes costs associated with contractors implementing programs on the administrator's behalf or other costs associated with implementation of the program.
Implementation (Dollars) Currently Encumbered	Currency	Funds encumbered (but not expended) in the current quarter for program implementation or technical support, which includes costs associated with contractors implementing programs on the administrator's behalf or other costs associated with implementation of the program..
Annual Business Support (Dollars) Expenditures Budget	Currency	Funds that are planned to be spent in the current year on facilitating new businesses and/or company growth such as incubator projects, ignition grants, proof of concept centers, and industry consortia or strategic partnerships.
Annual Business Support (Dollars) Expenditures Budget to Date	Currency	Funds that are planned to be spent through the current quarter on facilitating new businesses and/or company growth such as incubator projects, ignition grants, proof of concept centers, and industry consortia or strategic partnerships.
Business Support (Dollars) Expenditures this Quarter	Currency	Funds spent in the current quarter on facilitating new businesses and/or company growth such as incubator projects, ignition grants, proof of concept centers, and industry consortia or strategic partnerships.
Business Support (Dollars) Expenditures to Date	Currency	Funds spent through the current quarter on facilitating new businesses and/or company growth such as incubator projects, ignition grants, proof of concept

		centers, and industry consortia or strategic partnerships.
Business Support (Dollars) Currently Encumbered	Currency	Funds encumbered (but not expended) in the current quarter for facilitating new businesses and/or company growth such as incubator projects, ignition grants, proof of concept centers, and industry consortia or strategic partnerships.
Annual Tools, Training and Replication (Dollars) Expenditures Budget	Currency	Funds that are planned to be spent in the current year on tool development, workshops and training to enable replication of results; data and data warehouse activity that supports replication; development of fact sheets, case studies, and other written info to support replication.
Annual Tools, Training and Replication (Dollars) Expenditures Budget to Date	Currency	Funds that are planned to be spent through the current quarter on tool development, workshops and training to enable replication of results; data and data warehouse activity that supports replication; development of fact sheets, case studies, and other written info to support replication.
Tools, Training and Replication (Dollars) Expenditures this Quarter	Currency	Funds spent in the current quarter on tool development, workshops and training to enable replication of results; data and data warehouse activity that supports replication; development of fact sheets, case studies, and other written info to support replication.
Tools, Training and Replication (Dollars) Expenditures to Date	Currency	Funds spent through the current quarter on tool development, workshops and training to enable replication of results; data and data warehouse activity that supports replication; development of fact sheets, case studies, and other written info to support replication.
Tools, Training and Replication (Dollars) Currently Encumbered	Currency	Funds encumbered (but not expended) in the current quarter for tool development, workshops and training to enable replication of results; data and data warehouse activity that supports replication; development of fact sheets, case studies, and other written info to support replication.
Annual Research and Technology Studies (Dollars) Expenditures Budget	Currency	Funds that are planned to be spent in the current year for feasibility, environmental research or other studies, technology demonstration projects at specific locations, and project funding for development of a product or service.
Annual Research and Technology Studies (Dollars) Expenditures Budget to Date	Currency	Funds that are planned to be spent through the current quarter on feasibility, environmental research or other studies, technology demonstration projects at specific locations, and project funding for development of a product or service.

Research and Technology Studies (Dollars) Expenditures this Quarter	Currency	Funds spent in the current quarter on feasibility, environmental research or other studies, technology demonstration projects at specific locations, and project funding for development of a product or service.
Research and Technology Studies (Dollars) Expenditures to Date	Currency	Funds spent through the current quarter on feasibility, environmental research or other studies, technology demonstration projects at specific locations, and project funding for development of a product or service.
Research and Technology Studies (Dollars) Currently Encumbered	Currency	Funds encumbered (but not expended) in the current quarter for feasibility, environmental research or other studies, technology demonstration projects at specific locations, and project funding for development of a product or service.
Annual NYS Cost Recovery (Dollars) Expenditures Budget	Currency	Funds that are planned to be spent in the current year on fee that is imposed on NYSERDA by law to reimburse the State for the cost attributable to the provision of central government services to NYSERDA.
Annual NYS Cost Recovery (Dollars) Expenditures Budget to Date	Currency	Funds that are planned to be spent through the current quarter on fee that is imposed on NYSERDA by law to reimburse the State for the cost attributable to the provision of central government services to NYSERDA.
NYS Cost Recovery (Dollars) Expenditures this Quarter	Currency	Funds spent in the current quarter on fee that is imposed on NYSERDA by law to reimburse the State for the cost attributable to the provision of central government services to NYSERDA.
NYS Cost Recovery (Dollars) Expenditures to Date	Currency	Funds spent through the current quarter on fee that is imposed on NYSERDA by law to reimburse the State for the cost attributable to the provision of central government services to NYSERDA.
NYS Cost Recovery (Dollars) Currently Encumbered	Currency	Funds encumbered (but not expended) in the current quarter for fee that is imposed on NYSERDA by law to reimburse the State for the cost attributable to the provision of central government services to NYSERDA.
